Category Name M&O

Actionee HAIS

Sub Category

Subject IST maintenance

Description of Problem or Suggestion:

A plan has not been presented as to how IST software maintenance will be managed. Given that various hardware configurations and operating systems will be utilized to host the IST, a plan needs to be presented to clarify the plan for maintaining different versions of the IST. If users are going to be required to upgrade their operating systems or hardware at certain points in time, that policy needs to be defined.

Originator's Recommendation

Include a plan for IST software maintenance.
